Barr Auto Group Database

Matt Domagala
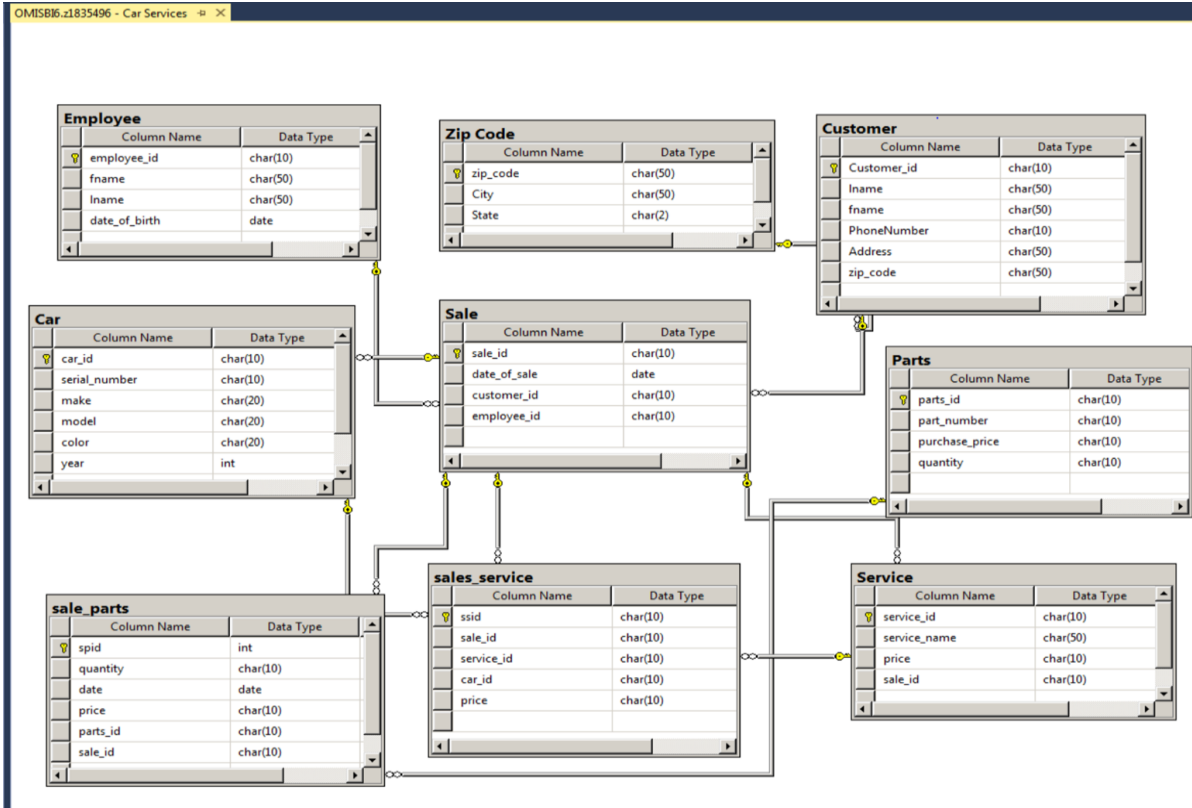

Overview of Barr Auto Group

Overview of the Company…

- Two locations, Chicago and Barrington
- Specializes in selling high-end Sports cars
- Needed a database to keep track of inventory and their customers
- 4 departments, sales service, accounting, and finance
- Database was needed because customer loyalty is everything!

Database

Struggles

Few struggles I had when creating my database project...

- Making my ER diagram and what the table names should be
- First time making a database, difficult getting started
- My database has 9 tables, would have more in the future
- Cardinality and modality of relationships
- Creating queries and getting the correct information

Lessons Learned

Few Lessons I have learned...

- How to create and make a database work

- In the future, take time when creating a database so it works correctly
